July 10, 2025 – Kenmore, WA – Our On Demand Basic 2-Way Radio Training Course has been chosen as an Enterprise Technical Knowledge Base.

Based on his technical staff student reviews, Dan Shepard and VEI Communications has committed to adopt our training as a standard for all current and future technical staff at VEI Communications.

This Class is a Comprehensive Look at basic 2-Way Radio. We provide a broad look at what is required to be a 2-Way Technician. The Training Guide is designed to be a durable reference as well as a presentation guide for the video portion of the class.

Because this class is presented On Demand we have been able to provide ongoing access to the videos for a refresher. Each video has been augmented with additional material to reinforce the printed information.

Contact us at 425-402-7308 or email info@phase4.org for more information.

Phase 4 Design, Inc. is located in the Pacific Northwest, near Seattle, Washington. We have been providing solutions to complex technical problems since 1989. Our nearly 50 years of combined experience in the areas of Two-way Radio / Public Safety / Paging, Telephony, LAN / WAN Network Design and Software System Design, makes Phase 4 Design, Inc. uniquely qualified to support Telex Radio Dispatch System Design, Implementation and Maintenance. Services are available Worldwide.
