**August 28, 2017 – Kenmore, WA** – Phase 4 Design, Inc. is excited to announce the development and deployment of our very first Remote Tactical Asset Communication Center.

The RTACC is a compact portable communications device that utilizes cellular radio technology, deployed in a ruggedized weather resistant case. This allows the user stay connected with live video and/or a multitude of telephony options no matter the environmental conditions.

RTACC was developed in cooperation with Washington Department of Fish and Wildlife to enhance situational awareness in a mobile environment. This project involved installation of RTACC units on 2 water craft used for BUI emphasis patrol during a large annual festival held on lake Washington.

Contact us at 425-402-7308 or email [info@phase4.org](mailto:info@phase4.org) for more information.

Phase 4 Design, Inc. is located in the Pacific Northwest, near Seattle, Washington. We have been providing solutions to complex technical problems since 1989. Our nearly 40 years of combined experience in the areas of Two-way Radio / Public Safety / Paging, Telephony, LAN / WAN Network Design and Software System Design, makes Phase 4 Design, Inc. uniquely qualified to support Telex Radio Dispatch System Design, Implementation and Maintenance. Services are available Worldwide.
